

Ekopartnerit Turku offers businesses a variety of waste and environmental management services and directs waste to utilization. At Topinpuisto, we utilize the best technology in the industry and apply the best practises with regard to the environment.

Gasum promotes sustainable energy economy by increasing the supply of biogas and developing a Nordic gas ecosystem. The Topinpuisto biogas plant provides services in biodegradable waste treatment, biogas production and recycled fertilizer manufacturing and delivery.

Kaivoasema provides trap and gully waste reception and treatment. The Topinpuisto collection point provides sand separator trap, grease trap, oil trap and rainwater gully waste treatment in Turku and the nearby municipalities.

Kuntec is an infrastructure company that provides landscaping services, building and maintenance services, as well as garage services. The Topinpuisto soil production station produces chips and soil out of twigs and leaves from the city's green spaces, as well as customer raking.

Kuusakoski is an industrial recycling service company. It is also a recycled metal refiner and supplier. The company's Topinpuisto branch provides the treatment of vehicles, automotive batteries, metal waste produced in industry and waste containing precious metals.

Lounais-Suomen Jätehuolto encourages sustainable consumer choices and arranges waste reception for households and public services in 17 municipalities. The waste reception, storage and preliminary treatment facilities, as well as the final disposal area are situated in Topinpuisto. The Topinpuisto sorting station provides services for the residents.
